

Onboarding Freshers at Wipro with end to end Managed services

Assignment Brief

A Worldwide technology major with a partner led strategy sales model, required a strategic partner for implementing and delivering their online labs solution. Through the online labs solution, the employees of their channel partners would be able to undergo self-paced training on Azure technologies enabling them to deliver training programs on their own, seamlessly.

Benefits

A smooth infrastructure solution for large scale technical training engagement

Challenges faced by the Customer

To implement an online labs solution that can scale to train 5000 professionals along with the capability to deliver hand-on-labs with a short lead time.

To develop deep technical skills amongst the channel partner developers and infrastructure professionals on the Azure

Highlights

- Implementation of an online labs solution along with the capability to provision infrastructure on demand to all the participants.
- Services set in place to monitor and manage the consumption of services.

Achievement

Delivery of more than 5000 Labs

Engagement Model

Project Outsourcing

Synergetics Value Proposition

End to End managed services for implementation and delivery of Online Labs
